CAPITAL IMPROVEMENTS ELEMENT Introduction to Annual CIE Update - 2004/05

ANNUAL UPDATE TO THE CAPITAL IMPROVEMENTS ELEMENT

This update amendment covers the five year period of 10/01/2004 through 09/30/2009. The amendment pages entirely replace the previous Exhibits section of the adopted Capital Improvements Element (CIE).

COMPLIANCE WITH THE EVALUATION AND APPRAISAL REPORT

For the 1998 Evaluation and Appraisal Report (EAR), the first eight elements Seminole County Comprehensive Plan (Spring Amendment 01S.TXT1) were adopted by the Board of County Commissioners (BCC) on May 8, 2001, and found in compliance by the Department of Community Affairs, as publicly noticed on June 27, 2001. The 2001 Spring Amendment, the first of two Vision 2020 amendment submittals, implemented the County's 1998 EAR based amendments.

The 2001 Spring Amendment amended the text portion of the Capital Improvements Element (Introduction, Issues, and Goals, Objectives and Policies) and the Exhibits portion which contains the capital improvements project schedules for each facility. The Libraries, Recreation and Transportation element portions. The Drainage, Potable Water, Public Safety, Sanitary Sewer and Solid Waste element portions were fully updated with the Spring 2002 CIE Update.

PURPOSE OF THE CAPITAL IMPROVEMENTS ELEMENT

The purpose of the annual update to the CIE is to adopt a five year, financially feasible, schedule of capital improvements for each facility element. These improvements address the maintenance of adopted Level of Service Standards and the achievement of adopted element policies and program goals. An annual update is required by Chapter 9J-5, Florida Administrative Code. In preparing the document, staff evaluates program and project costs, reviews revenue sources and projections to ensure adequacy to cover the five year period and reviews facility services to ensure maintenance of the adopted Level of Service standards.

Seminole County's Comprehensive Plan is comprised of the facility elements specified in Rule 9J-5, Florida Administrative Code as well as three optional elements (see list below). The elements are designed to ensure that the County's growth management plan is supported by adequate services and infrastructure in a timely fashion. The CIE provides an assurance of effective facility element implementation by adopting a financially feasible 5-year schedule of improvements for each type of facility, and by measuring whether those improvements are adequate to meet current and projected demands covering the 5-year period. (Note that the Natural Groundwater Aquifer Recharge is addressed in the Conservation and Future Land Use Elements with capital projects being incorporated in the Drainage, Potable Water, Sanitary Sewer or Transportation-Roads capital project programs.)

A Required Elements:

- 1 Drainage
- 2 Potable Water
- 3 Recreation & Open Space
- 4 Sanitary Sewer
- 5 Solid Waste
- 6 Transportation

Vision 2020 Comprehensive Plan Seminole County, Florida

B Optional Elements:

- 1 Libraries
- 2 Public Safety (Fire/Rescue)

ELEMENT UPDATE DETAILS

The update consists of two sections – a Facility Level of Service description and a Facility Program description:

Facility Level of Service Description

This section identifies for each element the facility type, service area and adopted level(s) of service. Within this section, the adopted level of service (LOS) for the Solid Waste Element as shown in *Exhibit CIE: Facility LOS - All Facilities* has been amended to cover the time period 2001/02 – 2005/06 based on the most current data and analysis which shows that capacity will be adequate beyond the planning horizon of 2020. This LOS will be reviewed and updated in conjunction with the next Evaluation and Appraisal Report (EAR) based amendments. The next EAR is due on September 1, 2006.

Facility Program Description - consisting of three parts to each element:

- A The “Summary of Policies, Programs and Capital Improvements with Cost Impacts” is a program description summarizing the overall capital program of the facility and identifies funding sources and any special issues faced by the facility. **Note:** The former Trails section of the Transportation Facility Program has been moved to and incorporated into the Recreation and Open Space Facility Program.
- B The “Capacity/Improvements Summary” reports existing and projected capacity and service demand figures based on the most recently adopted socioeconomic data series. This provides a check on whether any facility deficiencies are projected within the five year planning period.
- C The “Five Year Capital Schedule of Improvements” shows each major capital project and the dollars allotted to its implementation over the five year planning period. During the annual CIE amendment process, capital project schedules and funding sources are subject to continuing adjustment to reflect management and funding strategies developed in conjunction with preparation and adoption of each Annual Budget. Once the budget is adopted (September of each year), rebudgets of projects appropriated in the prior fiscal year are incorporated for the final adoption hearing of the CIE Update. By this means, the first year of the CIE is always consistent with the adopted annual budget for that year.

SUPPORT DOCUMENT UPDATE

CIE Element support material provided in support of this amendment contains the socioeconomic data used in evaluating each facility’s projected service demand, the basic demand calculations for each facility and a demonstration of the financial feasibility of the CIE based on the County’s Five Year Capital and Operating Budget.

Vision 2020 Comprehensive Plan Seminole County, Florida

Facility LOS - All Facilities

Plan Element	Facility Type	Service Area	Adopted Level of Service
Drainage	Drainage Structures	By Basin, Countywide	see Exhibit CIE: Facility LOS - Drainage
	Water Quality		see Exhibit CIE: Facility LOS - Drainage
Library Services	Library System Collection	Countywide (less Alt. Springs)	1.0 Book/Capita
Potable Water	County Water Treatment Plants	Service to portions of the unincorporated area and cities	350 Gallons/Day ERC
Public Safety	Fire/Rescue Units	Unincorporated Area	5 Minute Countywide Average Response Time
Recreation and Open Space	Urban Community Parks - Land and Facilities	Countywide	3.6 total acres/1,000 population
			1.8 developed acres/1,000 population
Sanitary Sewer	County Wastewater Treatment Plants	Service to portions of the unincorporated area and cities	300 Gallons/Day/ERC
Solid Waste	County Landfill	Countywide 2001/02-2005/06	Dwelling Unit - 4.2 lbs/day Employee - 4.7 lbs/day
	County Transfer Station	Countywide 2001/02-2005/06	Dwelling Unit - 4.4 lbs/day Employee - 4.9 lbs/day
Transportation	County Arterial and Collector Roads 2-lane, 4-lane, 6-lane	Vary by Character Area: Rural, Mixed Use Centers, Development Corridors and Neighborhoods	Daily/Peak Hour Per Transportation Element Policies for facilities impacted by Mixed Use Center traffic and facilities in Special Transportation Areas, facilities parallel to exclusive transit or toll facilities, physically or policy constrained facilities, backlogged facilities and other facilities. Per Transportation Element (FIHS per FDOT LOS Criteria Tables)
	State Roads	County -wide	
	Mass Transit System	Transit Service Area	1.03 revenue miles/capita translating the annual revenue miles standards as: 1.5219/Single-Family dwelling units 1.1255/Multi-Family dwelling units 1.3162/Hotel-Motel room 3.1164/Retail employee 0.4266/ Non-Retail employee

Vision 2020 Comprehensive Plan Seminole County, Florida

Facility LOS - Drainage

Level of Service Standards for New Development

Facility	Design Storm
Retention/Detention Basins (with positive outfall) - Sites and Subdivisions	25 Year, 24 Hour
Retention /Detention Basins (Landlocked with no positive outfall)	100 Year, 24 Hour (Total Retention)
Retention/Detention Basins - Adjacent to a public right-of-way with no positive outfall	25 Year, 24 Hour (Total Retention)
Closed Drainage System (Internal to Development)	10 Year, 3 hour
Roadside Swales	10 Year, 3 hour
Arterial and Collector Streets	10 Year, Hydraulic Gradient Line - 1.0 feet below gutter line
Local Streets	10 Year, Hydraulic Gradient Line - 0.5 feet below gutter line
Canals	25 Years
Bridges - The design frequency may be increased if found necessary by the Manager of the Development Review Division to protect upstream or downstream properties.	100 Years

Note: See the Drainage Element for additional policies relating to standards and new development.

Vision 2020 Comprehensive Plan Seminole County, Florida

Facility Program – Drainage

Summary of Policies, Programs and Capital Improvements with Cost Impacts Drainage

Scheduled Program and Cost Impacts for 10/1/2004 - 9/30/2009	
FY 2004/05 Elder Creek Improvements Yankee Lake Basin Evaluation NPDES Middle Basin Initiative/Regional Improvements – Joint Projects Funding	
FY 2005/06 – 2008/09 Big Econ Basin Evaluation Conveyance System Deficiency Correction Projects Neighborhood Improvements	
Total 5 Year Cost	\$26,083,493

Potential Additional Cost Impacts During/Beyond Five Year Planning Period
<ul style="list-style-type: none">· Implementation of water quality programs and deficiency corrections based on current NPDES permit.· Full funding, through construction phases, of certain projects.· Initiation of remaining 5 Basin Studies (Big Econ, St.Johns, Sanford, L. Harney, Puzzle Lake basins).· Future needed right-of-way acquisitions.· Further operating and management programs/costs.· Funding of the Total Maximum Daily Load (TMDL) program for Seminole County beginning FY2005/06 for NPDES Permit compliance.

Available Funding Options - Major revenue sources available to the Board of County Commissioners (either existing or available without voter approval) to fund all or portions of the Drainage Capital Improvement Element Update for Fiscal Years 2005/06 through 2007/08 are: General fund, Transportation Trust fund, Local Option Infrastructure Sales Tax fund (if major road system related), Stormwater assessment. The revenue capacities associated with each of the above major revenues provide sufficient funding to enable full implementation of the five year schedule of improvements identified as part of the CIE Update. In addition, federal/state funding and other public/private partnership funding will continue to be aggressively pursued.

Vision 2020 Comprehensive Plan Seminole County, Florida

Capacity/Improvements Summary

Stormwater Program

The following information is presented as an overview of the Stormwater Program which provides for continuing basin evaluations, capital improvements, initiation of water quality studies, and compliance with State and Federal regulations.

The Capital Improvements Element schedule of specific basin evaluations, studies, improvement projects, and equipment needs that are listed on the following pages represent the five year capital projects program. One of the primary goals of this program is to reduce system drainage deficiencies over time as allowed by funding. Level of service standards for Stormwater have been adopted for various types of road and development facilities which insure that no further deficiencies are created with new development. These standards can be found in *Exhibit CIE: Facility LOS - Drainage*.

Facility Program - Libraries

Summary of Policies, Programs and Capital Improvements with Cost Impacts Libraries

Scheduled Program and Cost Impacts for 10/1/2004 - 9/30/2009	
Funding to continue to maintain collection size of 500,000 volumes +/- 10%. Includes books, annuals, periodicals and collection maintenance as needed, taking into account the changing electronic formats in which these items are produced. Cost impact encompasses updates to reference collection, customer requests and replacement of lost/stolen titles.	
Total 5 Year Cost	\$3,526,433

Potential Additional Cost Impacts During/Beyond Five Year Planning Period
In 1998, the BCC approved a phased budgetary plan to increase the number of books from 1.0 to 1.5 books per capita (excluding the population of Altamonte Springs which has its own library). This figure was reached in 2002 with the attainment of approximately 500,000 volumes. Due to insufficient space in the existing library buildings to hold additional volumes, the rate of 1.5 will decrease yearly as the county population increases. The rate of vols/capita would further decrease if the population of Altamonte Springs (36,390 cardholders) were added to the system as recommended by a consultant prepared Strategic Plan for the library done in 2000. The rate is not projected to drop below the Comprehensive Plan adopted level of service of 1.0 vols/capita within the long range planning period.

Available Funding Options – Major revenue sources available to the Board of County Commissioners (either existing or available without voter approval) to fund all or portions of the Libraries Capital Improvement Element (CIE) Update are: General fund, Library Impact Fee fund, Library Contributions/Donations fund. The revenue capacities associated with each of the above major revenues provide sufficient funding to enable full implementation of the five year schedule of improvements identified as part of the CIE Update.

Vision 2020 Comprehensive Plan Seminole County, Florida

Capacity/Improvements Summary

Libraries

Year	Collection Volumes *
<u>CURRENT</u>	
Available - 10/1/03	527,750
Demand *	<u>362,908</u>
Surplus (Deficiency)	164,842
<u>SCHEDULED FIVE YEAR IMPROVEMENTS</u>	
Volumes **	0
<u>FIFTH YEAR</u>	
2009 Total Available	527,750
Demand *	<u>410,235</u>
Surplus (Deficiency)	117,515
<u>FUTURE</u>	
2020 Needed*	445,516

* Based on maintaining adopted standard of 1.0 book/capita for countywide library service population excluding Altamonte Springs which maintains a municipal library.

** Expansion of collection dependent upon expansion of space available.

Facility Program - Potable Water/Sanitary Sewer

Summary of Policies, Programs and Capital Improvements with Cost Impacts Potable Water and Sanitary Sewer

Scheduled Program and Cost Impacts for 10/1/2004 - 9/30/2009	
Among the projects scheduled for Environmental Services is a Computerized Maintenance Management Program for tracking all equipment and work orders, expansion of the Northwest Regional Wastewater Treatment facility to 3.9 million gallons a day (MGD) and expansion of the reclaimed system to include residential service in the Northwest area. Renewal requests for the NE and SE service area CUPs have been submitted and a consolidated CUP for all County service areas is being prepared for submittal. Projected shortfalls in water allocation for 2010 are expected to be addressed during the CUP allocation process and Water Supply Facilities Plan implementation in conjunction with the Regional Water Supply Plan.	
Total 5 Year Water Cost	\$49,879,377
Total 5 Year Sewer Cost	\$56,462,321
Grand 5 Year Cost	\$106,341,698

Potential Additional Cost Impacts During/Beyond The Five Year Planning Period
The required levels of treatment for sewer and water and programs needed to implement the treatment may change as the EPA continues research resulting in legislative amendments. Implementation of Master Plan recommendations has been initiated with the addition of several plant and distribution improvements. Due to possible acquisition (as of 6/6/04) of Florida Water Service service areas, additional capital projects may be identified and placed in the CIE.

Available Funding Options - Major revenue sources available to the Board of County Commissioners (either existing or available without voter approval) to fund all or portions of the Potable Water Capital Improvement Element Update are: General fund, Water and Sewer Enterprise fund, Water Connection Fee fund, Water and Sewer 21M Bond Proceeds, Development Review Fund. The revenue capacities associated with each of the above major revenues provide sufficient funding to enable full implementation of the five year schedule of improvements identified as part of the CIE Update.

Water Supply Facilities Work Plan - Status Update

New 2004 legislation requires this Plan to be adopted by 12/01/2006. The County has prepared a preliminary Plan which will be updated to give full consideration to the SJRWMD's Regional Water Supply Plan due mid-2005. At that point, a revised Plan will be brought forward through the large scale amendment process. At this time, the main components of the Plan will revolve around the following four basic programs:

- Development and optimization of groundwater supplies
- Water conservation program including conservation rate structure
- Expansion of reclaimed water systems
- Evaluation of alternative water sources

NOTE: The "Potable Water Notes" on following page are an integral part of this table. Check with the Seminole County Environmental Services Department for the most current figures.

Vision 2020 Comprehensive Plan Seminole County, Florida

Potable Water Notes

- 1 Physical plant permitted average day capacity.
- 2 Daily average pumping amount based on SJRWMD CUP permit allocation for the individual year and service area.
- 3 Projected demand is based historical flow information. Amounts have not been reduced due to effects of conservation or reclaimed water offsetting potable irrigation.
- 4 The Northwest and Northeast service areas are currently in the process of being interconnected.
- 5 SJRWMD Northeast CUP expired November 30, 2003. Renewal application submitted to District. Previous allocation shown.
- 6 SJRWMD Southeast CUP expired December 31, 2003. Renewal application submitted to District. Previous allocation shown.
- 7 The Black Hammock Service Area is served through a wholesale contract with the City of Oviedo.

Note: Projected deficits are based on existing facility capacity and current conservation efforts.

Sanitary Sewer

Sewer Service Areas (mgd)	2003			2009			2020
	Permit Capac (1)	Current Demand (ADF)	Surplus/ (Deficit)	Permit Capac (1)	Projected Demand (2)	Surplus/ (Deficit)	Projected Demand (ADF)
N West (3)	6.000	3.495	2.505	7.900	4.856	3.044	6.397
S East	8.506	4.498	4.008	8.506	5.769	2.737	6.842
S West	0.855	0.505	0.350	0.855	0.576	0.279	0.706
TOTALS	15.361	8.498		17.261	11.201		13.945

1 Design and permitted capacity.

2 Projected demand is based on the level of service standard of 300 gal/day/unit.

3 Northwest totals both the interconnected Yankee Lake and Greenwood Lakes service areas.

Facility Program - Public Safety

Summary of Policies, Programs and Capital Improvements with Cost Impacts Public Safety

Scheduled Program and Cost Impacts for 10/1/2004 - 09/30/2009	
<ul style="list-style-type: none">• Scheduled program and cost impacts include apparatus replacement, facility renovations, land purchase, station construction and purchase of an emergency training center. Apparatus replacement is conducted within fleet recommendations.• Facility renovations are to meet ADA compliance. Station construction costs are identified based on population growth, development and required response times.• The adopted five minute average response time level of service is expected to be met during the budget year and following years with the introduction of additional traffic pre-emption devices, currently underway, and the eventual implementation of an AVL - automatic vehicle locator system. Additionally, stations and response zone evaluations are in review to maintain the service level.	
Total 5 Year Cost	\$8,275,550

Potential Additional Cost Impacts During/Beyond Five Year Planning Period
<ul style="list-style-type: none">• The need for additional capital facilities such as engines, squads, rescues, stations and their associated costs to maintain an average response time of 5 minutes will be evaluated yearly in conjunction with other technologies and service provision strategies such as vehicle and/or station relocation and shared service areas.• The National Fire Protection Association Standard 1710 has recently introduced new guidelines for fire departments. This is a voluntary standard for compliance, but may prove to have costing elements beneficial to providing service.• Continued fire service mergers could present cost impacts. Though each merger would be entered into with the intent to save in overall cost, unforecasted costs could emerge.• Any future decision to replace the department's existing helicopter, acquired originally as government surplus, would add capital and operating project costs to the CIP.• An emergency training site has been purchased; a 5 year implementation plan is under development.• Continued high fuel costs would significantly impact future budgets.• Potential unfunded mandates re: Water Management District intervention and training costs.• If homestead allowance increase is passed, impact on service revenue would be significant.

Available Funding Options - Major revenue sources available to the Board of County Commissioners (either existing or available without voter approval) to fund all or portions of the Public Safety Capital Improvement Element Update are: General fund, Transportation Trust fund, Fire Protection fund, EMS Trust fund, Fire/Rescue Impact Fee fund. The revenue capacities associated with each of the above major revenues provide sufficient funding to enable full implementation of the five year schedule of improvements identified as part of the CIE Update.

Year	County Response Units*
<u>CURRENT</u>	
Available - 2003	32
Demand**	<u>35</u>
Surplus (Deficiency)	-3
<u>SCHEDULED FIVE YEAR IMPROVEMENTS</u>	
New units	3
<u>FIFTH YEAR</u>	
2009 Available	35
Demand**	<u>39</u>
Surplus (Deficiency)	-4
<u>FUTURE</u>	
2020 Needed**	44

* Response units include staffed engines, rescue, squad and tower vehicles

** Demand is based on the 1996 service efficiency standard of 4,100 Equivalent Residential Units per response unit. This is not an adopted standard but serves as a guide for the number of units needed to maintain a five minute average response time. The Department is currently meeting the adopted level of service with its existing units and will continue to do so during the five year planning period. Pending ongoing discussions relating to stations and response zones, up to 4 additional new units may be added.

Facility Program – Recreation and Open Space

Summary of Policies, Programs and Capital Improvements with Cost Impacts Recreation and Open Space

Scheduled Program and Cost Impacts for 10/1/2004 - 9/30/2009	
Costs cover additional lands acquired under the Natural Lands program and initial activities to open properties to the public as well as park and trail development. An additional \$2M will become available once the remaining bond referendum for trails/natural lands is issued.	
Total 5 Year Cost	\$ 19,930,188

Potential Additional Cost Impacts During/Beyond Five Year Planning Period
Natural Lands - Costs cover additional lands acquired under the Natural Lands program and initial activities to open properties to the public as well as park and trail development.
Trails - The existing 21.3 miles of paved and open trail will be expanded to 40.4 miles of Showcase Trails and 18.8 miles of Neighborhood/City Trails from 2004 - 2009. The trail system is not counted towards park acreage.

Available Funding Options - Natural Lands/Parks/Trails
County General Fund (Countywide Ad Valorem Taxes), with possible Natural Lands funding relating to initial capital costs for the joint use plans. An initial endowment fund towards long-term Natural Lands management costs has also been established. As master plans for preservation and passive use of Natural Lands sites are developed over the coming years, these properties will begin to be counted towards meeting the County's park acreage level of service standards. Bond proceeds for trails will be leveraged with various grants, State/Federal reimbursements, and local operating budget activities to advance implementation of the full referendum-based program over the coming decade. Additional referendum bond funds will be available for natural land acquisitions and capital improvements.

Facility Program - Solid Waste

Summary of Policies, Programs and Capital Improvements with Cost Impacts Solid Waste

Scheduled Program and Cost Impacts for 10/1/2004 - 9/30/2009	
The Solid Waste Management Division's planned capital improvement costs are related to work intended to maintain the solid waste management system and delivery of the level of service adopted in the Comprehensive Plan. Planned expenditures include replacement and upgrades of existing systems (e.g., pumping systems, tipping floor surfaces, etc.) and renewal of operating permits (including the Central Transfer Station's FDEP operating permit). No major expansions of the solid waste management system are planned.	
Total 5 Year Cost	\$ 8,006,563

Potential Additional Cost Impacts During/Beyond the Five Year Planning Period
Potential changes in grants legislation and EPA/FDEP regulatory requirements may alter future implementation and cost of various solid waste programs. Changes in FDEP rules and regulations concerning the operation of slurry-walled landfills could require the need for future landfill construction. No changes in these regulations are anticipated at this time.

Available Funding Options - Major revenue sources available to the Board of County Commissioners (either existing or available without voter approval) to fund all or portions of the Solid Waste Capital Improvement Element Update are: General fund, Solid Waste Enterprise fund. The revenue capacities associated with each of the above major revenues provide sufficient funding to enable full implementation of the five year schedule of improvements identified as part of the CIE Update.

Facility Program - Transportation: Mass Transit

Summary of Policies, Programs and Capital Improvements with Cost Impacts Transportation - Mass Transit

Scheduled Program and Cost Impacts for 10/1/2004 - 9/30/2009	
Funding for LYNX bus route service, Regional Transportation Agency membership and the American with Disabilities Act paratransit service. The bus routes are #1, #23, #34, #39, #41, #46 and #47. Additional monies are also available for the possible funding of commuter rail, light rail and other transportation initiatives as determined by the BCC.	
Total 5 Year Cost	\$ 17,861,937

Potential Additional Cost Impacts During/Beyond The Five Year Planning Period
Due to insufficient 9th cent gas tax revenue, the County and cities are working together through the Mayors and Managers committee to consider alternative funding mechanisms for future years. A new Lake Mary (#45) and new Midway-Sanford Airport route (#33) have been started and are initially funded by Workforce Central Florida and a Federal JARC Revenue grant.

Available Funding Options – Major revenue sources available to the Board of County Commissioners (either existing or available without voter approval) to fund all or portions of the Mass Transit Capital Improvement Element Update are: General fund, Mass Transit/9th Cent Gas Tax fund, Local Option Infrastructure Sales Tax. The cities also contribute funds towards fixed bus service and ADA paratransit service.

Facility Program - Transportation: Roads

Summary of Policies, Programs and Capital Improvements with Cost Impacts Transportation - Roads

Scheduled Program and Cost Impacts for 10/1/2004 - 9/30/09	
Costs include funding for: <ul style="list-style-type: none">State Road Network ImprovementsCounty Road Network Improvements - Joint projects with the CitiesTraffic Management ImprovementsSidewalk ProgramsPedestrian Overpasses	
Total 5 Year Cost	\$392,561,581

Potential Additional Cost Impacts During/Beyond Five Year Planning Period
The September, 2001 referendum renewal of the local option sales tax has enabled programming of specific projects to provide a wide variety of transportation improvements, including previously identified needs on the State Road system. Evolving needs not fully addressed, however, include major road network improvements in the vicinity of key economic drivers in Seminole County. An example of such a need relating to the Orlando-Sanford Airport is the widening of SR 46 from Sanford Avenue west to SR 415, and the widening of SR 415 which are not fully funded through construction.

Available Funding Options - 1 Cent Sales Tax and Impact Fees are projected to cover costs for the majority of the planned major improvements, with the County Transportation Fund supporting the school and small safety sidewalk programs. Major revenue sources available to the Board of County Commissioners (either existing or available without voter approval) to fund all or portions of the Traffic Circulation Capital Improvement Element Update are: General fund, Transportation Trust fund, Local Option Infrastructure Sales Tax fund, Arterial Impact Fee fund, North Collector Impact Fee fund, West Collector Impact Fee fund, East Collector Impact Fee fund, South Central Impact Fee fund, CDBG Fund. The revenue capacities associated with each of the above major revenues provide sufficient funding to enable full implementation of the five year schedule of improvements identified as part of the CIE Update.

- (1) Additional lanes or other improvements programmed as listed in the FDOT workprogram.
- (2) Policy Constrained/all or part in County's adopted Transportation Element.
- (3) Monitor traffic operating conditions.
- (4) Under construction.
- (5) Advance funded by Seminole County one cent sales tax monies. Construction funded in 2008/09.
- (6) City of Oviedo planning 2-way 2 lane pairs through downtown Oviedo.

Note: This summary presents only those existing, classified roadways in the County which have: either a current or five-year deficiency; or improvement activity in the FDOT 5 Year Work program or the County's CIE. The evaluations of projected traffic operating conditions on State roads made for the 2000 Update have reinforced the need for continued monitoring and development of multimodal transportation strategies to address levels of service on State roads. The increasingly limited availability of capacity on State roads to accommodate new or expanded land development activities is threatening the County's ability to achieve important Federal, State and County goals, objectives and policies. Even with the use of travel time and delay studies, peak hour evaluations and other more rigorous techniques, available capacity is rapidly becoming depleted on significant portions of I-4, US 17-92, SR 434, and SR 436. Also, shorter segments of SR 46 and SR 426 are becoming capacity deficient. Many of these deficient State Roadway segments are policy constrained to 6 lanes in the County's comprehensive plan. For the remainder, the FDOT has not programmed construction of additional lanes in the first three years of the adopted 5-year Work Program. The lack of available capacity on State roads and the failure to program needed capacity improvements is creating a critical problem for the County. The extent of these projected roadway capacity deficiencies requires the County to begin specific development and implementation of the multimodal strategies first presented in the 1991 Comprehensive Plan. These strategies have been further refined in this update to the Comprehensive Plan and additional policies and implementing devices have been identified. In part, implementation of these strategies will be through a series of special areas studies and designation of special transportation areas as appropriate. In addition, the County has worked extensively with FDOT to advance fund projects through the County's second generation one cent sales tax. This has resulted in the County advance funding the six laning of SR 434 from Montgomery Rd./Wekiva Springs Rd to Rangeline Rd. and in turn FDOT has agreed to move up the construction of the six laning of US 17/92 from Shepard Rd. to Lake Mary Blvd.
